Manual Lifts

Its simples, rugged and widely used product. Specially used in various residential projects. We have various door options to cater to different design challenges and taste in building constructions.

Standard Features

- Down / Full collective control.
- VVVF Drive for Door & Lift.
- Emergency L.E.D Lighting & Automatic Rescue Device (A.R.D).
- Over speed & Overload Protection Devices.
- Full curtain infrared door safety along with alarm and intercom systems.

Please ask for exclusive design and features our R&D team is ready to hear and deliver.

Freight Lifts

It's most commonly used in industries or hotel for goods and services movement. Rugged chequered floor design for heavy duty usage. The same can be customized to suit your special needs on loads for your vertical movement. Also available open platform (Scissor Lift) for typical industrial or garage applications. Both traction and hydraulic modules available.

Standard Features

- Down / Full collective control.
- VVVF Drive for Door & Lift.
- Emergency L.E.D Lighting & Automatic Rescue Device (A.R.D).
- Over speed & Overload Protection Devices.
- Full curtain infrared door safety along with alarm and intercom systems

Please ask for exclusive design and features our R&D team is ready to hear and deliver.

MRL Lifts (Machine Room-less Lifts)

Its latest advance technology in vertical transportation. It provides greater freedom to architect in designing building especially commercial ones. Gearless motor is used by default which cuts down operational cost drastically. Machine room is not required at all.

Standard Features

- Down / Full collective control.
- VVVF Drive for Door & Lift.
- Emergency L.E.D Lighting & Automatic Rescue Device (A.R.D).
- Over speed & Overload Protection Devices.
- Full curtain infrared door safety along with alarm and intercom systems

Please ask for exclusive design and features our R&D team is ready to hear and deliver.

Technical Specification

Load		Lift Shaft		Car Inside		Clear	Pit	Overhead

Car Lifts

Most Frequent requirement of modern day building. Our cars need to be parked in building at various level to transport them we require car lift. We have both type of Car-lift, Hydraulic and Traction.

Standard Features

- Down / Full collective control.
- VVVF Drive for Door & Lift.
- Emergency L.E.D Lighting & Automatic Rescue Device (A.R.D).
- Over speed & Overload Protection Devices.
- Full curtain infrared door safety along with alarm and intercom systems h

Please ask for exclusive design and features our R&D team is ready to hear and deliver.

Stacker Car Parking

Its most commonly used in most of applications be it Residential, commercial industrial or any other utility services. We provide from simplest cost effective variant to latest state of art technology to choose from. We cater to all your application and needs.

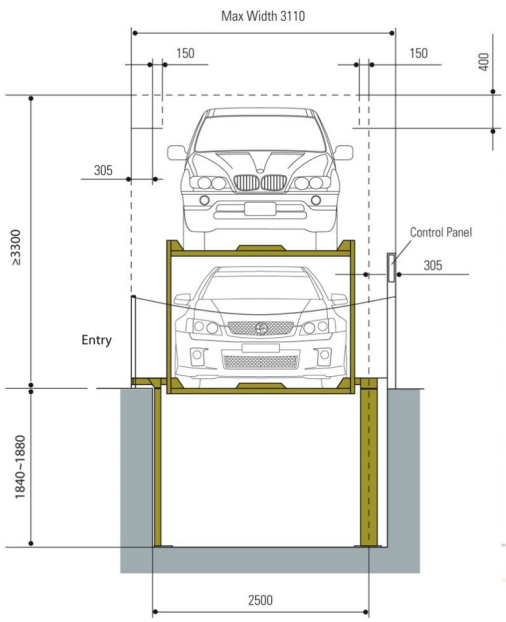

PRUDUCT RANGE:

- Two level Stack Parking
- Cantilever Stack Parking
- Three Level Stack parking
- Three level Pit Stack Parking

Standard Features

- Hydraulic and Electro-mechanical both options available
- Simply Double the parking space.
- Most cost efective model with least break down.
- Negligible operation and maintainence cost.
- In built safety lock. optional sensor safety available.

Please ask for exclusive design and features our R&D team is ready to hear and deliver.

Technical Specifications

2 Level stacker parking system

System Height			Pallet width	System width	Pallet length	Lifting capacity
Total Height	Lower height	Upper height				
3500	1700	1700	2200	2600	4000 to 4500	2000 kgs
3800	2000	1700				
4100	2000	2000				

3 level stacker parking system

- System dimensions - 2600(w), 4500 to 5000(l), 5800(h).

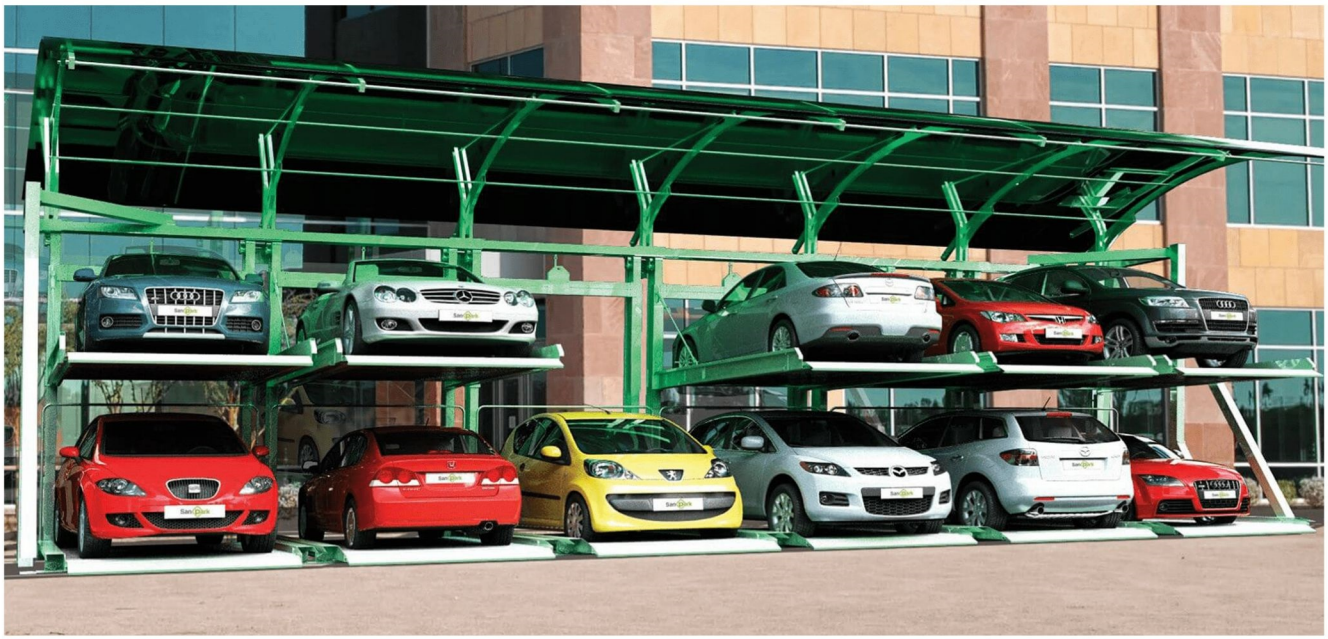

3 level stacker parking system with pit :

- System dimensions - 2600 (w),5500 (l), pit depth 2200 , above ground ht 3800.

All dimensions in mm.

Puzzle Car Parking

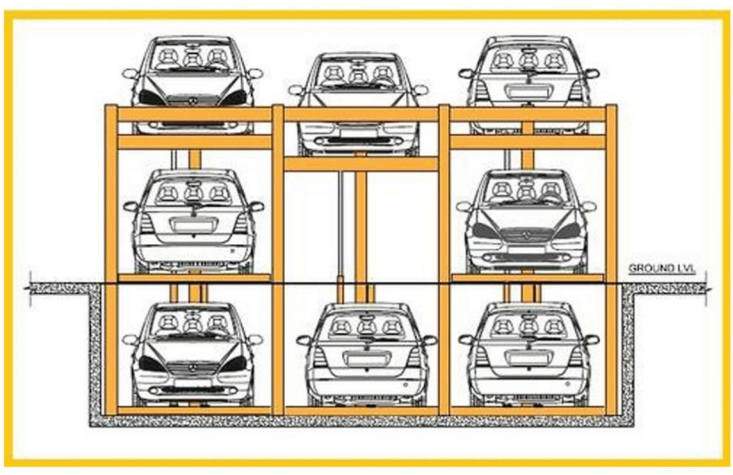

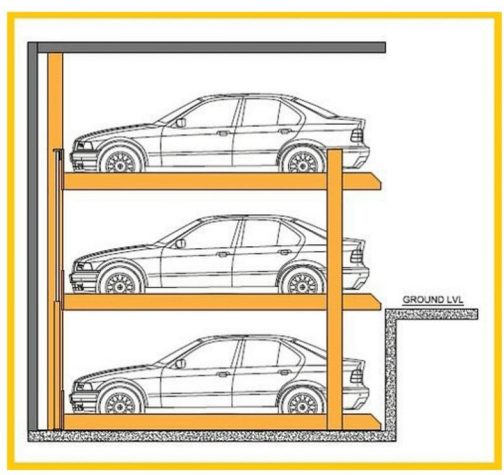

It is semi-automated parking system. interdependency os stack is over comed. All parking slot is independent and availble on command. Can be convenintly gelled with building . available modules pit type above ground and mix of both. Customised consultancy available for planning.

Standard Features

- Both hydraulic and electromechanical modules available.
- Interlocking safety inbuilt in logic and also solenoid locks provided.
- PLC based system for reliable operation and end to end customisation.
- Over speed & Overload Protection
- Sensor Safety and alarm . optional PMS system.

Please ask for exclusive design and features our R&D team is ready to hear and deliver.

CIRUS SOLUTIONS
COMMERCIAL INDUSTRIAL RESIDENTIAL UTILITY SERVICES

Other Car Parking System

We have our strong expertise in car parking system. we have end to end solutions. also we have customised solution as per your available space. please note some more parking options. Get in touch for concept designing and parking planning with us.

CART TYPE CAR PARKING SYSTEM

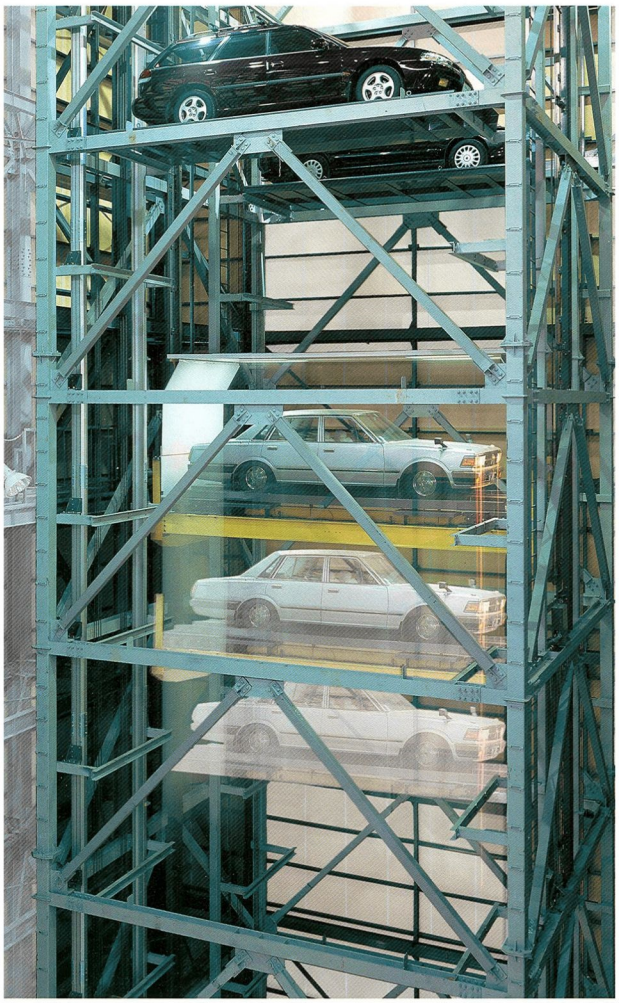

FLOOR CAR PARKING SYSTEM

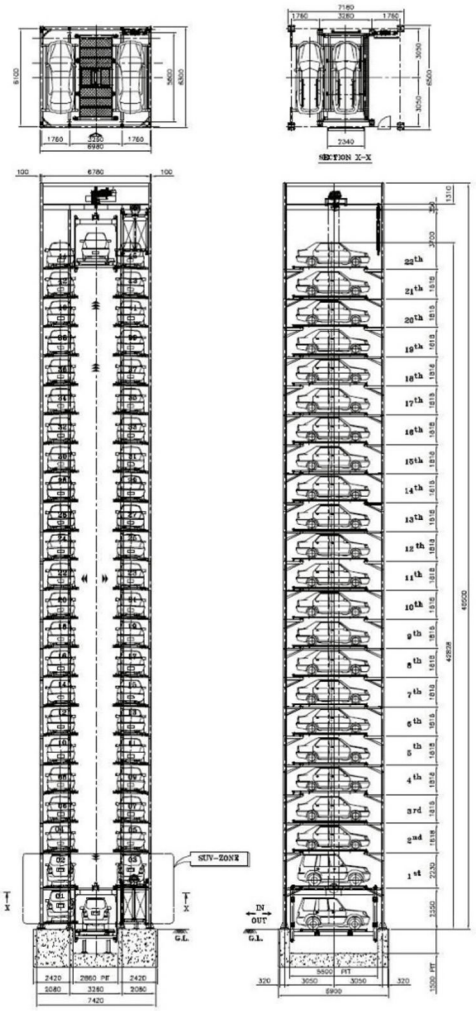

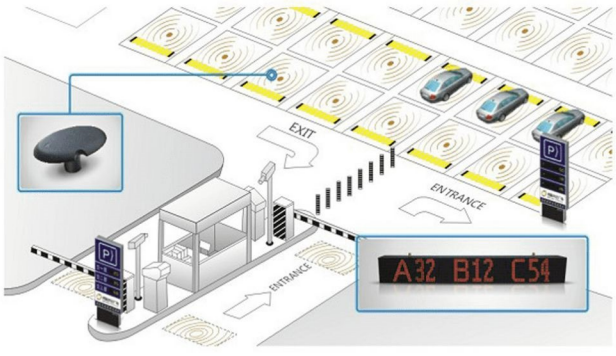

CIRUS SOLUTIONS
COMMERCIAL INDUSTRIAL RESIDENTIAL UTILITY SERVICES

Tower Parking System

Fully automated parking solution. maximum number achived in nominal space. It can be standalone or part of building. In footprint area of 3 car par 50 cars can be accommodated. Foot print area 7.5*6.5 mtr and Height 50 mtr. Call us now for all your parking needs.

CIRUS SOLUTIONS
COMMERCIAL INDUSTRIAL RESIDENTIAL UTILITY SERVICES

Gate, Boom Barrier & Bollards

We have various options and designs for gate like Conventional Sliding gate, Trackless cantilever gate, Telescopic gate, swing gate etc. we use various MOC(Material of construction) like Mild Steel, Stainless steel, Wood,Glass, PVC etc. Apart from this we have Boom Barrier and Bollards which are completely designed and delivered as per your precise requirement.

Standard Features

- We provide rugged motorized gate with IP65 Motor cover, Galvanized (Metal and Nylon rack optional), Heavy wheel (Metallic and Nylon optional).
- Interlocking safety inbuilt in logic and Solenoid Gate locks (optional).
- PCB-Card based system for reliable operation and PLC (optional) for end to end customization.
- Over speed, overload & phase reversal. Soft start & soft stop with alarm optional.
- Sensor Safety and gate retraction. RFID- option for next level automation.

Please ask for exclusive design and features our R&D team is ready to hear and deliver.

CIRUS SOLUTIONS
COMMERCIAL INDUSTRIAL RESIDENTIAL UTILITY SERVICES

Doors & Shutters

We have various options and designs for doors and Shutter like Glass door, Swing Glass door, Manual geared shutter, motorized shutter central motor shutters. Etc. we use various MOC like Mild Steel, Stainless steel, Wood, Glass, PVC, Puff insulated panel, isotherm slate etc.

Standard Features

- We provide rugged motorized Door and Shutter with IP55 Motor cover.
- Interlocking safety inbuilt in logic and Solenoid Gate locks (optional).
- PCB-Card based system for reliable operation and PLC (optional) for end to end customization.
- Over speed, overload,& phase reversal . Soft start & soft stop with alarm optional.
- Sensor Safety and Door or shutter retraction. RFID - option for next level automation.

Please ask for exclusive design and features our R&D team is ready to hear and deliver.

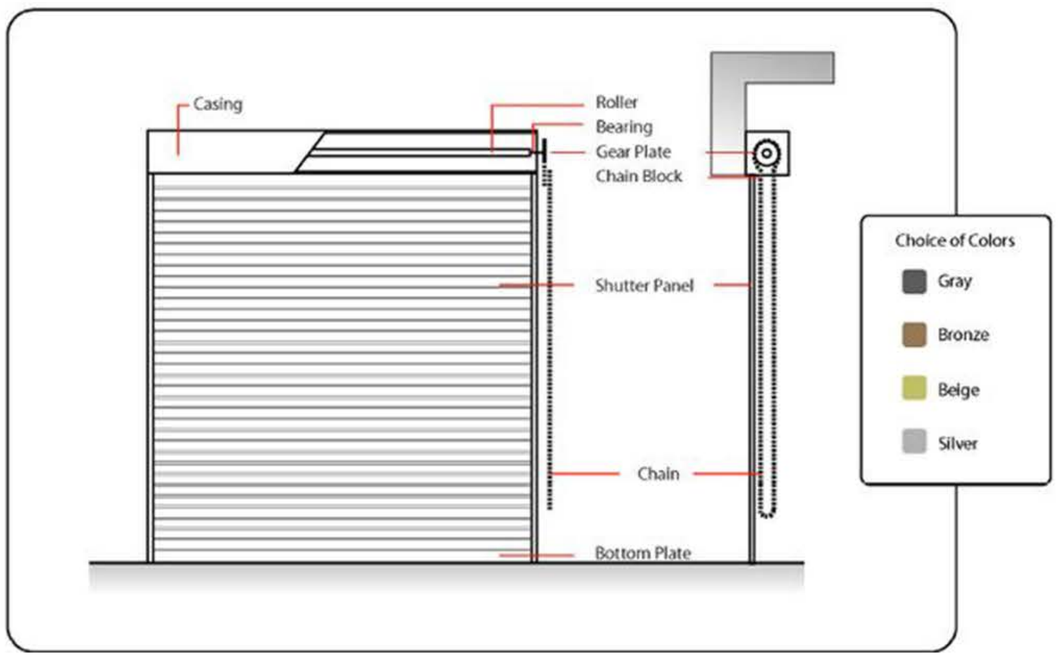

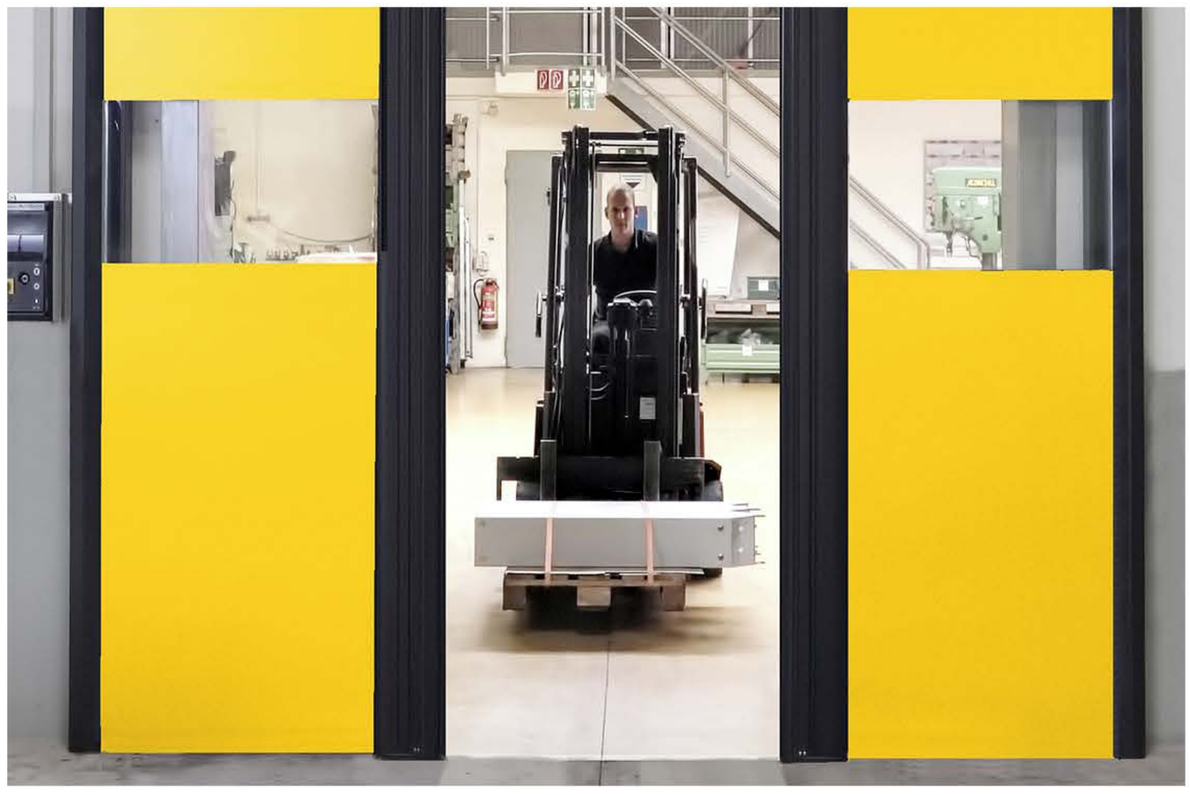

CIRUS SOLUTIONS
COMMERCIAL INDUSTRIAL RESIDENTIAL UTILITY SERVICES

High Speed Doors

We have various options and designs for H.S.D like Standard Reinforced PVC door-from Belgium. We have various option based on application like clean room H.S.D, cold room H.S.D, Self repairing H.SD, Fold-up H.S.D , interchangeable H.S.D etc. This is available with or without vision panels.

Standard Features

- We provide rugged motorized H.S.D speed 1~2.5m/s with IP55 Motor cover.
- Size max 6000*6000mm & standard colors Similar to.
  RAL 1021 RAL 5010 RAL 3002 RAL 7035 RAL 2004 RAL 6005 RAL9003
- PCB-Card based system for reliable operation and PLC (optional) for end to end customization.
- Various operation method available like sensor, pull-cord, magnetic loop detector etc.
- Sensor Safety and Door or shutter retraction. RFID - option for next level automation.

Please ask for exclusive design and features our R&D team is ready to hear and deliver.

CIRUS SOLUTIONS
COMMERCIAL INDUSTRIAL RESIDENTIAL UTILITY SERVICES

Sectional & Garage Door

We have various options and designs for up sliding, sliding sideways and up-siding foldable. Etc. we use various MOC like Puff insulated panel, Rockwool, eco friendly Rice Husk etc. This is mainly used in cold storage application & garages. Rockwool is primarily used for fire rated doors

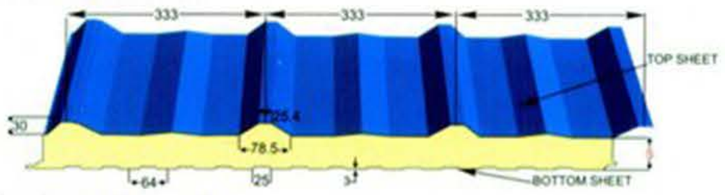

Standard Features

- We provide rugged motorized sectional door with IP55 Motor cover.
- Interlocking safety inbuilt in logic and Solenoid Gate locks (optional).
- PCB-Card based system for reliable operation and PLC (optional) for end to end customization.
- Over speed, overload,& phase reversal . Soft start & soft stop with alarm optional.
- Sensor Safety for Sectional or Garage door retraction.

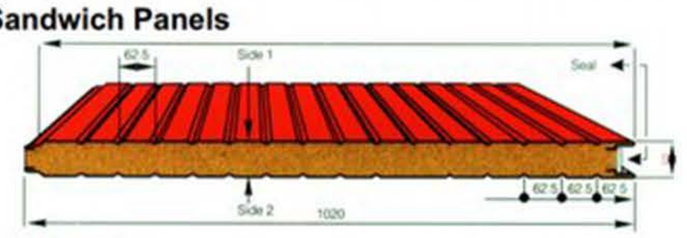

Please ask for exclusive design and features our R&D team is ready to hear and deliver.

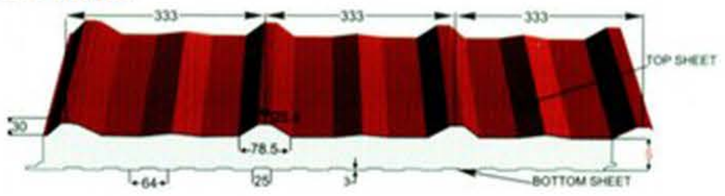

PU/PIR Sandwiched PUF Panels

Rock Wool Core Sandwich Panels

EPS Core Sandwich Panels

CIRUS SOLUTIONS
COMMERCIAL INDUSTRIAL RESIDENTIAL UTILITY SERVICES

Loading Bay Equipment

We have two types of Dock leveler Radius Lip and Telescopic dock leveler. MOC is m.s Chequered plate with anti skid surface almond shape. 10 gauge thick with reinforced section at bottom. We also have manual Dock Lip with customization option. And Hydraulic Scissor stationary or fixed type in various shapes and size. Also available Dock shelter mainly three types-Retractable, Cushion and Inflated.

Standard Features

- We provide rugged Hydraulic dock leveler with adjustable lip.
- Full side toe guard to prevent foot entrapment.
- PCB-Card based system for reliable operation.
- Over speed, overload,& phase reversal .
- Standard Width 2000mm Length 3000-4000 mm, pit width 2040 mm pit height 960-1160 mm.

Please ask for exclusive design and features our R&D team is ready to hear and deliver.

CIRUS SOLUTIONS
COMMERCIAL INDUSTRIAL RESIDENTIAL UTILITY SERVICES

Air Hanger & Heavy Doors

We have various options and designs for up sliding, sliding sideways and up-siding foldable,Telescopic. Etc. we use various MOC like Puff insulated panel, M.S corrugated sheet, eco friendly Rice Husk sandwich panel etc. This is mainly used in Air–Hangers, Heavy industrials shed. Size is not limitation in this we can customize as per requirement with innovation.

Standard Features

- We provide rugged motorized sectional door with IP55 Motor cover.
- Interlocking safety inbuilt in logic and Solenoid Gate locks (optional).
- PCB-Card based system for reliable operation and PLC (optional) for end to end customization.
- Over speed, overload,& phase reversal . Soft start & soft stop with alarm optional.
- Sensor Safety for Sectional or Garage door retraction.

Please ask for exclusive design and features our R&D team is ready to hear and deliver.

CIRUS SOLUTIONS
COMMERCIAL INDUSTRIAL RESIDENTIAL UTILITY SERVICES

ECO-Smart Home & Automation

We have fabricate and deliver low cost house which can be dismantled and shifted or re-designed and modified with nominal cost. This can be very compact and convertibles design too. Eq. in 100 sqft on wards. In Automation we can provide Solar system backed energy saving module . which ensures 24 /7 energy witch is required for automation

Standard Features

- We provide smart energy management system.
- Lighting Automation with conversion of all equipment on remote or smart phones.
- PCB-Card based system for reliable operation and PLC (optional) for end to end customization.
- Solar energy services and equipment.
- Steel home unit with insulated rice husk panel eco- friendly and economical homes.

Please ask for exclusive design and features our R&D team is ready to hear and deliver.

CIRUS SOLUTIONS
COMMERCIAL INDUSTRIAL RESIDENTIAL UTILITY SERVICES

Consultancy, AMC & Fabrication

We have team and network of strong technocrat who are ready to provide consultancy . We have team of experienced field workers who handle AMC – services to all the products we supply. We have strong team of experienced welders and fitter to handle fabrication as per design. We can design ourselves based on your need and deliver.

Standard Features

- We provide consultancy at nominal cost.
- The same is absorbed if we bag the project.
- We are open to handover the technology to customer if the wish to maintain the product on their own.
- We provide training or trained staff if required to operate or maintain the systems.
- We are open to new ideas conceptual to designing and execution with economically viable analysis.

Please ask for exclusive design and features our R&D team is ready to hear and deliver.

CIRUS SOLUTIONS
COMMERCIAL INDUSTRIAL RESIDENTIAL UTILITY SERVICES

SOLAR ON-GRID SYSTEM

Commercial Rooftop Solar Plant

Residential Rooftop Installation

Grid-connected solar systems generate clean electricity through daylight hours and feed surplus power back to the utility network using net metering. Monthly energy bills fall sharply with no battery storage required — making on-grid the fastest pay-back route to solar for homes, commercial complexes and industrial facilities.

Standard Features

- Net Metering Compatible
- Reduced Electricity Bills
- High Return on Investment
- Low Maintenance
- Remote Monitoring
- 25+ Year Panel Life
- Environment Friendly
- Scalable Modular Design

Commercial Solar Installation

Industrial Rooftop System

CIRUS SOLUTIONS
COMMERCIAL INDUSTRIAL RESIDENTIAL UTILITY SERVICES

SOLAR STANDALONE (OFF-GRID) SYSTEM

Standalone Solar Array

Off-Grid Powered Home

Independent solar power systems engineered for locations without a dependable grid connection. Energy harvested during the day is stored in a battery bank and released on demand — keeping essential loads running through the night and during outages, delivering complete energy autonomy wherever you need it.

Standard Features

- Battery Energy Storage
- Complete Grid Independence
- Reliable Backup Power
- Suitable for Remote Locations
- Expandable Capacity
- Smart Charge Controller
- Long Service Life
- Energy Security

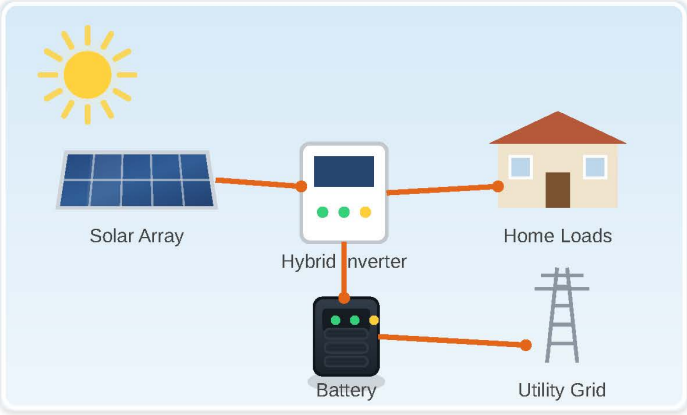

Agricultural Installation

Rural Electrification Project

CIRUS SOLUTIONS
COMMERCIAL INDUSTRIAL RESIDENTIAL UTILITY SERVICES

SOLAR HYBRID SYSTEM

Solar + Battery + Grid Architecture

Modern Hybrid Installation

Hybrid solar systems intelligently combine solar generation, battery storage and utility-grid support to draw on the best of every source. Power flows automatically between solar, batteries and the grid — maximising self-consumption, managing peak demand and guaranteeing an uninterrupted supply even during a power cut.

Standard Features

- Solar + Battery + Grid Integration
- Power During Outages
- Peak Load Management
- Smart Energy Optimisation
- Reduced Electricity Costs
- Remote Monitoring
- High Reliability
- Future-Ready Solution

Commercial Hybrid Project

Energy Storage Installation

CIRUS SOLUTIONS
COMMERCIAL INDUSTRIAL RESIDENTIAL UTILITY SERVICES

SOLAR ACCESSORIES & SOLUTIONS

A complete ecosystem of solar products and balance-of-system solutions — engineered to extend, automate and protect every installation we deliver.

Solar Water Pumps

- Diesel-free irrigation & water supply
- Automatic sun-optimised operation
- Near-zero running & upkeep cost

Solar Robot Cleaning System

- Waterless, automated panel cleaning
- Recovers output lost to dust & soiling
- Scheduled, labour-free operation

Solar Street Lights

- All-in-one panel, battery & LED
- Dusk-to-dawn automatic lighting
- No trenching or grid wiring needed

Solar Monitoring & Control

- Real-time generation & fault alerts
- Remote performance dashboards
- Maximises plant uptime & ROI

Optional Additional Products

Solar Inverters

Lithium Battery Banks

Mounting Structures

Charge Controllers
